

How to install TopTurnier myHeats when Play Protect warns...

General Information:

TopTurnier myHeats is definitely not a security risk! The only reason Play Protect warns is that myHeats wants to be open for all Android devices from version 4 and therefore targets an older Android API. As a result, Play Protect now warns about an "older" app on newer devices.

We strictly adhere to the privacy regulations of the GDPR. If you want to learn more, please read our privacy policy at <https://TopTurnier.de/datenschutz.htm> (sorry, only in German language so far).

How to install the app, if there is happening a warning like shown below?

In the first dialog please tap on "More details" and in the second dialog on "Install anyway".

Please do NOT tap the OK button! This will end the installation process without installing the app.
